

All Hands Meeting Notes: October 11, 2011

Agenda Items:

Storage updates, migration of /scratch from EMC nssdeep/nssha

NSSDEEP is independent of scratch; nsspha is the scratch; scratch is being synched; reaching out to users on this – Plamen will help;

kvm updates and sunset of vmware (cause of CNS crash)

Conflicting IPs; original machines in VM ware were turned back on and that created the problem; deleted the vm wares to prevent this problem; looking to archive or remove them; took vm on old system and fired it up on the new system;

TMS update installation

VM imported to vm ware; plan to do this in scalable way using TMS; need to review with TMS; review and solidify plan, move to next steps; need more clarification on site license; answer from TMS is you can put multiple instances on one box; RC will take care of systems administration;

Psychology storage migration project

HUIT working with psyche department – sunset directory; move WH data across; some data was human subject data that required heavy security; Need to determine who will pay for the storage;

SPINAL and LIMS selections

Small molecule instruments with billing went live on Oct. 1st, as well as bio laser; HCBI stuff is gradually smoothing out – first invoices sent out; Adam working with Clair and Sunia on selecting LIMS – maybe hiring a short term LIMS developer; working on spam SPINAL email problem – sending to a more valid email;

Archival storage (as per Jerry last month)

All old EMC kits have been repurposed; net new back-ups; tape storage – scaler is mapped – cost for expanding the tape;

60 Ox firewall update

RC not touched in any way by this;

HRCI updates, GoogleHealth etc.

Pick-up hosting projects that are currently hosted on Google Health which will be shutting down – security issues again

SCRB moves

RC to deal with PO for this – storage arrays for SCRIB labs;

New two factor auth system (new access nodes)

Replace RSA – new access nodes; give access nodes to the community – more login nodes, larger pool to distribute jobs

Other

Page for storage pricing (internal or PIN); publish a cap – as of current pricing it will be less than xyz; page that publishes what RC leases – page with general number and no vendor info; we can get some much storage not to exceed x...

Roundtable Updates:

Anne Marie C: work stations for GPI; UD deployments – re-install database from HUH; instrument machine went down; compiling complaints and comments about database

John B: software installs; NOVA experiments to begin, new software to come online

Eric M: Div of Science website launch and database for Research Development complete

Plamen K: ticket requests and software installs

Vincenzo D: ready to move database and applications (1 by 1) out of RC; new cluster with 2 different servers;

Jeff K: reached out to Paul Amante about anything he needs; Peabody TMS server; volumes in and mounted; corrected genius for HCBI; small molecule – meeting with Sunia – walk through of the process – account requests, etc.; virtual citrix node – can turn that up if necessary; looking at AD – getting machines off nucleus;

Jeff C.: working on Nagios – configurations – system is up – tweaking now;

Mike E: new entry VMs up and running

Luis S: CBS – synching up data;

Matt N: catch ups today for CBS; puppet clean ups and backups;

Jiangwen Z: license on SPINAL calendar working well; SPINAL check-out thing working well;

Jerry L: NCC entry – 1 empty rack in Cambridge
